Objective — Motivated Java Backend Developer with strong knowledge of Core Java, JDBC, SQL, and database management. Experienced in building scalable backend applications and problem-solving. Passionate about developing secure, efficient systems and exploring cloud technologies to create real-world software solutions.

Education

Noida Institute of Engineering & Technology, Greater Noida

Master of Computer Applications (MCA)

Ram Lakhan Singh Yadav College, Aurangabad

Bachelor of Computer Applications (BCA)

Jul 2024 – Present

CGPA: 7.76

2020 – 2023

Percentage: 71.73%

Projects

Online Banking Website (HTML, CSS, JavaScript)

- Developed the frontend of a banking website to manage user accounts, transactions, and balance display.
- Designed responsive web pages using HTML and CSS for a clean and user-friendly interface.
- Implemented JavaScript for form validation, dynamic content updates, and interactive features.
- Collaborated on integrating the frontend with backend services and database-driven functionalities.

Online Quiz Application (Java + SQL)

- Designed and developed a Java-based online quiz system with user login and score tracking.
- Implemented backend logic for quiz flow, answer validation, and result calculation.
- Integrated MySQL database to store questions, user data, and performance records.
- Built a structured and user-friendly interface to improve quiz experience.

Certifications

- **Google Cloud Facilitator Program (Arcade Program)** – Google Cloud
Completed hands-on labs and cloud skill challenges on Google Cloud Platform, covering cloud fundamentals, compute, storage, and networking.
- **Google Cloud Skills Boost Profile:** cloudskillsboost.google/raushan-kumar

Skills

- **Programming:** Java, Python, C, SQL, HTML, CSS
- **Backend & Database:** JDBC, Servlets (Basics), MySQL, Oracle, DBMS, Query Optimization
- **Cloud & Tools:** Google Cloud Platform (GCP), Linux, Git/GitHub, VS Code, Postman
- **Core Concepts:** OOPs, Data Structures, Exception Handling, Multithreading (Basics), SDLC
- **Web & APIs:** REST API Basics, Client-Server Architecture, HTTP Methods

Training

Java Backend Development (CRT Training) – Pyramid, NIET

June 2025 – August 2025

- Completed Campus Recruitment Training (CRT) focused on Core Java and backend development.
- Strengthened programming fundamentals including OOPs, Exception Handling, and JDBC.
- Worked on logic-building exercises and mini-projects involving database connectivity.
- Gained practical exposure to MySQL, client-server architecture, and real-world application flow.
